

CODE WITH MIRACLE

C++ TRY WORK 2

3. One large chemical company pays its salespeople on a commission basis. The salespeople each receive \$200 per week plus 9 percent of their gross sales for that week. For example, a salesperson who sells \$5000 worth of chemicals in a week receives \$200 plus 9 percent of \$5000, or a total of \$650. Develop a C++ program inputs each salesperson's gross sales for last week and calculates and displays that salesperson's earnings. Process one salesperson's figures at a time ✓
4. Write an application that inputs temperature in degrees celsius and prints out the temperature in degrees Fahrenheit. [NB: $\text{Fahrenheit} = 1.8 \times \text{Celsius} + 32$] ✓
